# 4871.MOT.V3

## MINING OUTLET TESTER

Patent No: AU2018204677

### Application:

The 4871.MOT is a complete mining outlet tester for metalliferous mining industry and is equipped with many testing features.

The MOT has a diverse range of applications at various voltages.

This compact, lightweight, and robustly designed unit is the perfect solution to Mining Restrained Outlet Testing requirements.

### Features:

- High speed and robust design
- User friendly
- Touch screen operation for all tests
- Live battery voltage information
- Phase - Phase voltage
- Phase – Earth voltage
- Phase frequency
- Phase rotation
- Earth leakage lockout test
- Frozen contactor test
- Earth continuity, short, open and shunt circuit tests
- Remote Start/Stop
- Earth leakage test with standard or customized current levels
- Enclosed in a sturdy carry case for enhanced portability and durability
- Light weight and long battery life for continuous operation
- Remote mobile MOT APP

502 mm  
(WEIGHT: 12.5kg)

V3 Wi-Fi enabled (Optional)

Calibration Service
